

Please reject NAB's petition 04-160.

I have been a satellite radio subscriber for 2 years and signed up for the service because I travel extensively. Satellite radio now provides me with weather and traffic information to some of the places I travel to. The information is provided hours before I arrive in the local area and can start receiving local radio broadcasts. Therefore I can plan my routing long before I arrive in the local area.

Do not allow this valuable service to be discontinued or curtailed. Since I pay for this service I should be allowed to have it continue if I wish. Thank you!
